

Our Process

Order Placed
Pathology orders are introduced to the health system, digitally.

Labels Printed
Physical tracking process begins using serialized item information.

Digital Logbook
Digital tracking begins in earnest, automated through the workflows.

Courier Transport
Couriers interact with system, documenting chain of custody seamlessly via apps.

Package Prepped
Laboratory is notified seamlessly via apps of package being sent or requiring a pickup.

Results Delivered
Systems maintain full life-cycle visibility into pathology workflows, allows full transparency.

Lab Accessions
As couriers drop packages off & packages are received, system updates in real-time.
